

# Welcome to workshop 1

Review of UKPMS Core Functionality  
Barry Cleave  
17<sup>th</sup> February 2009

## Our purpose today

- Critically review the business needs, objectives and priorities for PMS for local authorities in the UK,
- Critically review how a PMS should meet those needs,
- And identify which parts of the functional specification should be **CONSISTENT** between all PMS in the UK (the “**core**”)

## pcis

# Today's approach

- Presentation of our ideas
- Discussion in groups at the tables
- Feedback from the tables to a plenary discussion

 

## pcis

# Today's agenda

- The project and our vision for UKPMS
- The business needs – what do local authorities require a PMS to do for them?
- What should a “good” PMS offer – what would we expect a commercial system to be able to do?
- What has to be the same in all systems, and why?
